## CDI LIGHT METER

SOUTH BEND, IN, JANUARY 30, 2010: Control Development, Inc. has introduced a high performance light meter. CDI Light meter is the ideal instrument for the measurement of lamps, fluorescents, LEDs, LED chips and flat panel displays. Measure spectral irradiance ( $w/m^2/nm$ ), absolute intensity, chromaticity (CIE 1932 2° or CIE 1964 10° observer), L, a, b, color coordinates, correlated color temperature and color rendering indices. Included software also contains peak detection capabilities, derivatives and smoothing functions.
