Design and Engineering Services

South Bend, In, January 26th, 2012: Control Development, Inc., inventors of the pc plug-in spectrometer, is now offering design and engineering services. Our expertise covers all areas of spectroscopy, from UV-VIS to NIR. We offer solutions from laboratory applications to on-line process analysis. We can tailor solutions to your needs by designing custom spectrometers and sample interfaces.

Areas of expertise are optics, electro-optics, electronics, data analysis, chemometrics and software. Industries served are food, agriculture, pharmaceutical, semiconductors, solar cells, LEDs and fraud prevention.
